

DIRECTIONS: Read the **WARNINGS** section before use. **Product can be used on arms, underarms, legs and bikini area.**

1. APPLY CREAM OUTSIDE OF SHOWER: Skin must be dry before application. Unplug pump and turn counterclockwise to dispense cream onto smooth side of dry sponge. Apply an even, thick layer to cover hair. **DO NOT RUB IN.** Repeat until the entire area where hair to be removed is covered. Wait at least 1 minute before showering.

2. SHOWER: Shower following your usual routine. For optimum performance, keep skin where cream has been applied away from direct stream of water. A small amount of wash off is not unusual. Leave cream on your skin for at least an additional 2 minutes. **DO NOT EXCEED 10 MINUTES** of total application time.

3. REMOVE/RINSE: Total hair removal time depends on hair thickness. Using the bumpy side of rinsed sponge, test a small area. If hair comes off easily, continue removing by massaging in a circular motion. If hair does not come off, leave cream on longer without exceeding 10 minutes of total application time. **RINSE SKIN THOROUGHLY.** Do not rub. Pat dry gently. Rinse the sponge and replace the plug.
